Hosted VoIP

Voice over Internet Protocol (VoIP**)** is an overarching term for transmitting your voice over the internet (or internet like connection). Our Hosted VoIP Platform provides your company with all the features of an enterprise organization with a fraction of the maintenance and cost.

VoIP FEATURES LIST

Our Hosted VoIP Solution comes in 3 different packages, depending on the needs of your business. Whether you're connecting a conference room or need to stay connected when your employees are traveling the country - OneVoice Hosted VoIP has you covered.
