

Introducing IMC's Air Purification Products

Advanced Technology that Combines Science with Filtration

Healthy Water | Healthy Air | Healthy You

Proprietary Technology

Introducing IMC Air Purification

ActivePure® is the only air cleaning technology awarded the prestigious Certified Space Technology seal by The Space Foundation

Purifies up to 2,000 sq feet/unit

IMC Air Purification BG

Purifies up to 2000 sq. ft.

Quality Air Purification gives people confidence that it is ok to return to the office.

Ideal for offices, conference rooms, kitchens, breakrooms and lobbies as well as workout and common areas.

- 23”H x 20”W x 11”D
- Weight – 34 pounds
- 5-year limited warranty

Work | Office

Technology originally developed by NASA for Space!

It is estimated that work **absenteeism costs U.S. employers \$1,685 per employee** each year. Even in non-pandemic scenarios, it can be smart business to spend some time focusing on healthy indoor environments for workers.¹

Protect your employees from viruses, bacteria, allergens, and indoor air pollution. Proprietary ActivePure® Technology works to continuously clean, circulate and protect air and surfaces 24 hours a day creating pristine air quality.

IMC Air Purification PC

Purifies up to 500 sq. ft.

Quality Air Purification gives people confidence that it is ok to return to the office.

Ideal for smaller environments, “personal space” - i.e. home office, study, bedroom; individual office space at work, pantries; as well as doctor’s offices’ and patient rooms.

- 11.75”H x 9.5”W x 10”D
- Weight – 7.6 pounds
- 3-year limited warranty

“The invaluable service... provided to the Pentagon was outstanding. I **witnessed tremendous improvement in the air quality in the offices.** Your timely assistance when we needed it the most will always be remembered.”

Commanding Colonel, US Army

ActivePure® Technology was used to purify the air after 9-11 at the Pentagon

Technology originally developed by NASA for Space!

ActivePure® is the only air cleaning technology awarded the prestigious **Certified Space Technology seal by the Space Foundation.** This proprietary ActivePure® Technology and it is the only **Certified Space Technology** that works to continuously clean and protect air and surfaces 24 hours a day.

IMC AIR PURIFICATION

Why Choose IMC Air Solutions?

ActivePure® Technology | Combines science with filtration | Made in the **USA**

1. **Vast differentiator...** ActivePure® Technology has been proven to kill pathogens and contaminants, other filtration products simply trap them.
2. **Eliminates on contact...** Our proprietary ActivePure® Technology actively targets contaminants in the air and on surfaces, eliminating them on contact. This eliminates germs from spreading - IMC - ActivePure Technology
3. **ONLY company to use ActivePure® Technology.** This technology is derived from **NASA** Technology as used on the International Space Station. It is the **only** Certified Space Technology in the world in its class.
4. **Meets California Air Quality Standards** - The highest air quality standards in the USA
5. Purifies up to **2000 sq. ft.**
6. **The only air purifier** on the market that uses an exclusive combination of technologies, including ion generation, a better-than-HEPA filter, Photocatalytic Oxidation and our proprietary ActivePure Technology.
7. **Traditional passive technologies, such as HEPA,** use filtration or electrostatic systems, which remove contaminants only if and when they travel through the purification unit. These traditional filtration systems can help reduce air pollution to a degree, but they do not reduce surface contamination at all (our units do!) and do not adequately reduce airborne contaminants.

IMC AIR PURIFICATION

How ActivePure® Technology Provides Healthy Air

1. **University studies** have shown that ActivePure® Technology can reduce at least 96.4% and as much as 99.99% of surface and airborne contaminants within the first 24 hours, performing at better than HEPA Filtration levels on particles as small as 0.1-micron
2. In tests, 90% of the airborne pathogens measured were reduced in only 30 minutes, a rate **50 times more effective than normal filtration**. Another reason to take personal responsibility for the quality of the air you breathe
3. **Removes** VOCs, and significantly reduces dust particles and odors without using ozone
4. ActivePure® Technology is effective against **H1N1, H5N8, MRSA, Staph, Streptococcus, E-Coli, Listeria, Bacillus spp, Stachybotrys Chartarum** and more
5. Molecules are transformed into **friendly-yet-powerful oxidizers**, when molecules are released back into the air, the supercharged ActivePure molecules seek and rapidly destroy contaminants
6. **Protects against allergy and asthma** triggering contaminants and respiratory issues which may lead to health problems
7. **Destroys** smoke and odors without ozone
8. Whisper quiet
