Items evaluated and tested
 Deemed scrap or marked for reuse/resale

Items are resold or broken down for scrap, which is also sold
 Scrap and each item is in the system by inventory ID

Money back based on actual worth in system
 Check or credit toward future projects
 Balance updated in real-time as items and/or scrap is sold

Protecting business data and the planet with secure, environmentally-sound data destruction and IT recycling services

AUDIT-READY INVENTORY LISTS

We provide the most thorough documentation on data destruction and IT recycling services. At the time of the job, all serial numbers are recorded by our proprietary data collection software and hand-held scanners for audit and accountability purposes.

Quickly and easily access full inventory lists complete with product name, category, serial number, and asset tag. We back that up with our Certificate of Recycling and Destruction -- a nationally recognized legal document.

WE COME PREPARED

Before each project, a Securis expert is sure we know all we need to ensure a seamless, pain-free experience for our customers. We'll be in the right place at the right time with uniformed staff and the proper equipment.

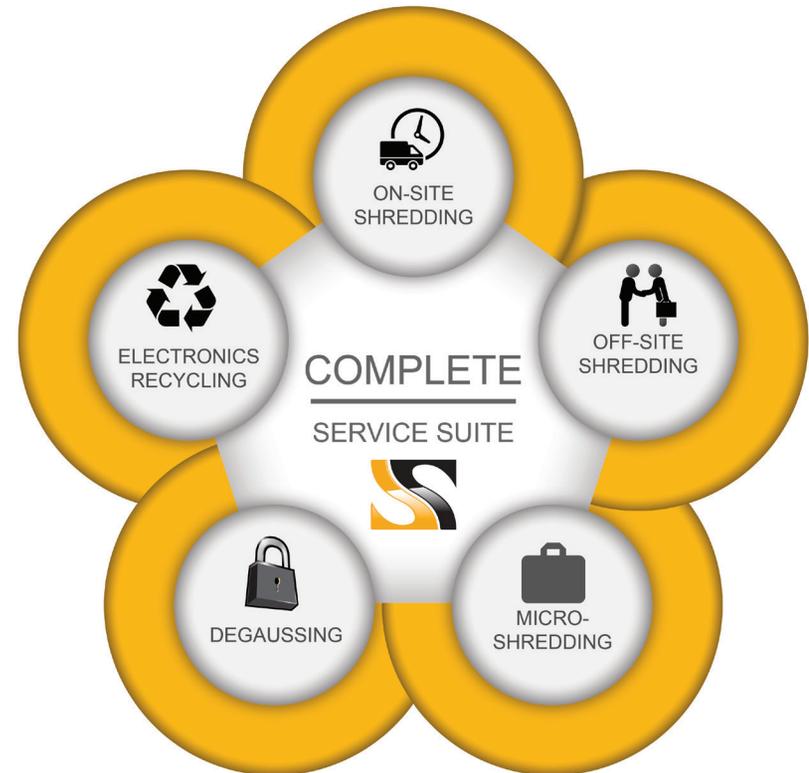

DATA BREACH PROTECTION

Securis has perfected our data destruction and IT recycling services over the more than 15 years we've been in business.

If you're not 100% satisfied with your project, your next one is on us.

GUARANTEED.

“We have had the pleasure of working with Securis for the past 8 years. I have complete trust and a peace of mind with them. I know our equipment will not end up in a landfill, moreover I do not have a worry about any risk for a data breach.”
