PERIS

### ■ Confidential Lobbying Firm

Peris took a cold shell space and transformed it into a distinguished 30,000 SF office on Capitol Hill. The porcelain tile flooring and lacquer millwork panels on the elevator lobby are sophisticated design elements. The reception area is equipped with innovative lighting and a custom fiberglass desk. Connecting the two floors is an internal spiral staircase finished with polished stainless steel and marble. The conference center is highlighted with glass partitions, multiple fold-ing partitions, custom lighting, and video conferencing capabilities. Architect: Davis Carter Scott
