■ The Leadership Conference on Civil and Human Rights

The Leadership Conference on Civil and Human Rights Washington, DC office consisted of all new construction from a 13,500 SF shell. A prominent feature is a pantry and catering space that opens to the reception area and large conference room. The large conference room was designed with fixed and moveable seating to allow for multiple room layouts that accommodate up to 150 individuals. All perimeter offices were constructed with glass office fronts to allow natural light to flow through the interior of the space. Architect: FORM Architects
